## Long-Term Soil Surfactant

**Conduit 90** is a long-term soil surfactant which provides more consistent management of turf requirements even in today's unpredictable weather of drought or excessive rain. **Conduit 90** works 24/7 to relieve the effects of soil water repellency by returning the soil to a more uniform moisture profile. When applied early in the season or before water repellency conditions appear, **Conduit 90** will help prevent localized dry spot conditions from forming but can also be applied during extreme heat or drought conditions without fear of failure or damage to turf. **Conduit 90** performs above expectations to safely combat the formation of soil water repellency for up to 90 days.

- Improves turf quality while combating the effects of soil water repellency
- Provides uniform moisture and nutrient coverage
- Lasts 90 to 120 days in the soil profile
- Reduces localized dry spots
- Encourages deep water penetration
- Safe to turf
- Money back guarantee

### COMPOSITION

**Conduit 90** Long-term Soil Surfactant is a non-toxic, nonionic, non-flammable, non-corrosive and biodegradable formulation of soil surfactants.

**Active Ingredients:**

99% Alkoxylated polyols  
1% Water

**Conduit 90** Long-term Soil Surfactant is available in 55, 30 and 2.5 gallon recyclable containers.\*

\*Check with your distributor for availability.

### APPLICATION RATES

**Golf, Lawns, and Sports Turf**

**Full Rate Application**

Apply 16 ounces per 1,000 ft<sup>2</sup> in 5 gallons of water (50 L/ha in 2,000 L). Reapply after 90 days or as needed.

**Split Application**

Apply two applications 7 to 10 days apart at 8 ounces per 1,000 ft<sup>2</sup> in 2.5 gallons of water (25 L/ha in 1,000 L). Reapply a split application after 90 days or as needed.

Irrigate after each application to remove the surfactant from the plant surfaces.
