

Compact™

The **Vredo Compact** series is an accurate and efficient range of disc seeders designed for inter-seeding into prepared seedbeds or existing stands of turf. At an approximate spacing of 3", seed is placed in a V-shaped slit, at a controllable depth of 3/16" to 1" deep, directly in contact with the soil for maximum germination rate. The slits are then closed by a roller and a level surface is re-established. The **Vredo Compact** series includes precision calibration and a ground driven system allowing inter-seeding to be completed at speeds between 1 and 12 mph. Seed will be accurately sown at a set rate independent of ground speed. The **Vredo Compact** series are 3-point mounted and have two widths available to suit tractor overlap.

HIGHLIGHTS

- Industry leading germination rate
- Minimal surface disruption – no clean up needed
- Proper seed to soil contact to maximize germination
- Each disc is independently suspended allowing continuous disc to soil penetration over undulating ground

Specifications

	DZ 214.075	DZ 218.075
Working Width	54"	71"
Transport Width	60"	76"
Weight (approx)	1,687 lb	1,958 lb
Sowing Depth	3/16" - 1"	
Row Spacing	2 15/16"	
Disc Diameter	16"	
No. of Disc Sets	18	24
Seed Hopper Volume	4.9 cu. ft.	6.3 cu. ft.
Compaction Roller Volume	36 gal (300 lb)	47 gal (392 lb)
Power Requirement	30 - 60 hp ◊	40 - 70 hp ◊

Tractor Requirement: ◊ Refer to individual tractor specifications for lifting capacity
