

KORO® Recycling Dresser®

The Imants KORO Recycling Dresser is a heavy-duty aerator and root zone recycler. The **Recycling Dresser** aerates vertically and horizontally, removes the underlying soil from the root zone, and redistributes soil as a topdressing across the playing surface. This vertical and horizontal aeration mitigates layering and compaction, increases biological activity, and allows for better utilization of existing fertilizers in the soil. The **Recycling Dresser** reduces the amount of new topdressing required, thus saving labor and material costs as well as promoting sustainable maintenance. The **Recycling Dresser** is best used on loamy to sandy soils.

HIGHLIGHTS

- Mitigates layering and compaction
- Reduces time and labor over traditional cultural practices
- Recycles current root zone, saving on topdressing required

Specifications

	RD 1900
Working Width	75"
Transport Width	87"
Weight (approx)	2,811 lb
Working Depth	4" - 7"
Blade Spacing	11 7/8"
Blade Thickness	5/16"
Number of Blades	24
Power Requirement	45 - 90 hp ◊

Tractor Requirement: 540 pto, Creep gear or hydrostatic drive required, 4-wheel drive recommended, ◊ Refer to individual tractor specifications for lifting capacity

Operating Speed: 0.3 to 0.75 mph
