pHlow-ject™

Injectable Soil Acidifier

pHlow-ject is an injectable soil acidifier designed to lower the pH of the soil solution and enhance the infiltration of water applied through irrigation systems. **pHlow-ject** is a blend of soil wetting agents combined with a unique blend of acidifying agents and is compatible with all conventional irrigation systems. Follow instructions and technical information from equipment manufacturers. **pHlow-ject** will not harm turfgrass when used according to label directions.

- Lowers pH resulting from poor water quality
- Improves soil and irrigation water quality
- Increases water infiltration and penetration
- Increases soil moisture uniformity
- Reduces run off and evaporation of fertility treatments
- Improves drainage
- Money back guarantee

COMPOSITION

pHlow-ject is a non-toxic, non-ionic, non-flammable, non-corrosive and biodegradable formulation of wetting agents and acidifying agents.

Active Ingredients:

- 8% Non-ionic polyols
- 3% Hydrochloric acid (corrosion inhibited)
- 3% Phosphoric acid (corrosion inhibited)

pHlow-ject is available in 264, 55, 30 and 2.5 gallon recyclable containers.*

*Check with your distributor for availability.

APPLICATION RATES

Golf and Sports Turf

Inject 1 to 2 quarts per acre (3 to 5 L/ha) at 7 day intervals or as needed.

A jar test should be performed prior to mixing. DO NOT combine pHlow-ject in the spray tank with pesticides or fertilizers unless prior use has shown the combination physically compatible, effective and non-injurious under local conditions.
