

# Enhancing Your Nematode Program

## Excalibur Added to Your Abamectin Program will Increase Seasonal:\*

- *Root Length*
- *Turf Quality*
- *Turf Color*
- *Turf Density*

\* Excalibur plus Abamectin has been proven more effective than Abamectin alone.

# Treatment Response

## Preliminary Effects of Spiral Nematodes

Dr. Martin - 2021

"What I see is that Excalibur™ has a stronger influence on turf density and quality than Abamectin alone. The combo is superior and is the strongest treatment effect I have ever seen from Abamectin and a wetting agent" - Dr. Bruce Martin

### Treatment Response After 2 Applications

Untreated

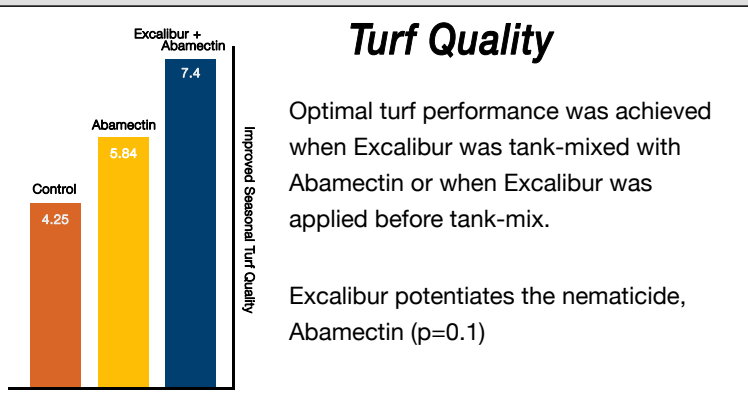

Abamectin

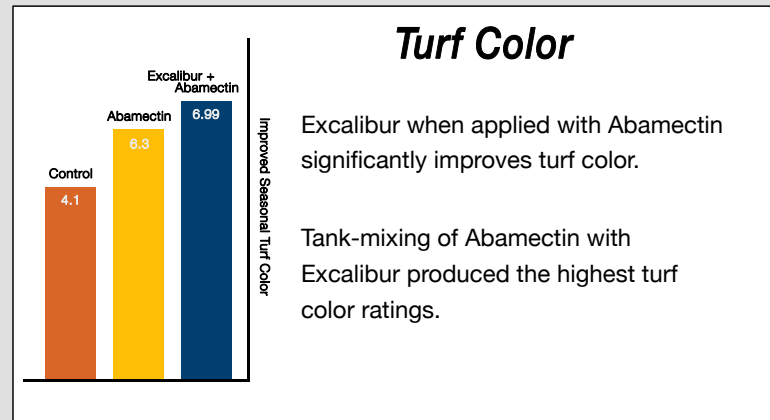

Excalibur + Abamectin

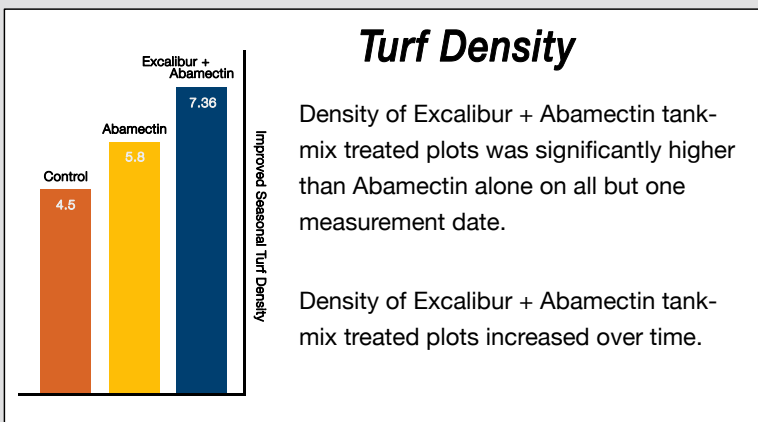

#### Turf Quality

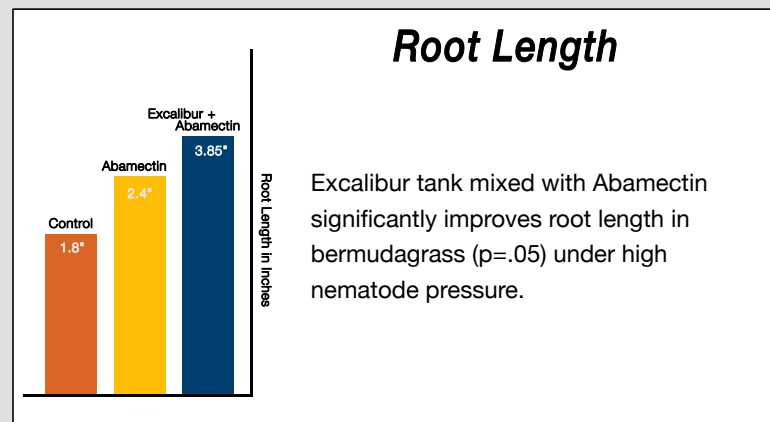

#### Turf Color

#### Turf Density

#### Root Length

### Application Guidelines

- Apply Excalibur at 3 oz per 1000 sqft in 2 gallons of water every 28 days tank mixed with your Abamectin application.
- Excalibur applied at the above rate will replace your current surfactant application.
