

AQAAG™

Penetrating Hydrator

Push Your Hydration Zone
Deeper While Maintaining
A Fast Firm Surface

Hydrator and Penetrant Combination

Penetrating Hydrator

Exceeding the customers expectations!

Golfers want a fast, firm playing surface and superintendents want a hydrated root zone!

AQAAC is a pre-mixed combination of hydrating soil surfactants and penetrating soil wetting agents formulated to provide better infiltration of applied water and a more uniform soil moisture profile while maintaining a drier playing surface. The combination of hydrators and penetrants in **AQAAC** allows turf managers to more effectively manage soil moisture deeper in the soil profile.

AQAAC is an environmentally safe formulation of soil surfactants and wetting agents that can be injected through irrigation systems and/or tank mixed for spray application.

Stir or agitate **AQAAC** before use.

- Provides a uniform soil moisture profile
- Reduces water surface tension
- Increases water penetration
- Reduces water usage
- Low rates
- Increases nutrient uptake
- Money back guarantee

COMPOSITION

AQAAC is a non-toxic, non-ionic, non-flammable, non-corrosive and biodegradable formulation of surfactants and wetting agents.

Active Ingredients:

- 80% Propoxylated polyethylene glycols
- 8% Non-ionic polyols

AQAAC is available in 55, 30 and 2.5 gallon recyclable containers.*

*Check with your distributor for availability.

APPLICATION RATES

Golf, Lawns, and Sports Turf

Apply two applications 15 days apart at 3 to 4 ounces per 1,000 ft² in 2 gallons of water (10 to 13 L/ha in 800 L). Reapply at 2 to 4 ounces per 1,000 ft² in 2 gallons of water (6 to 13 L/ha in 800 L) at 30 day intervals or as needed.

Irrigate after each application to remove the surfactant from the plant surfaces.

Inject two applications 15 days apart at 1 to 4 quarts per acre (3 to 10 L/ha). Reapply at 1 to 2 quarts per acre (3 to 5 L/ha) at 30 day intervals or as needed.
