DIRECTIONS FOR USE

Golf, Lawns, and Sports Turf

Spray: Apply 1 to 1.5 ounces per 1,000 ft² in 2 gallons of water (3 to 5 L/ha in 800 L) at 30 day intervals or as needed. Irrigate with sufficient water to deliver **Acidi-pHlow** to the soil profile - 1/8 inch (3 mm) or more recommended.

Injection: 1 gallon per 50,000 gallons (1 L per 50,000 L) of irrigation, as a guideline depending upon water quality, irrigation usage, and weather/rainfall conditions.

Overseeding: Apply 2 quarts per acre (5 L/ha) one week prior to overseeding. Immediately follow overseeding with a second application at 2 quarts per acre (5 L/ha). Irrigate after each application to remove the surfactant from the plant surfaces.

DO NOT combine **Acidi-pHlow** in the spray tank with pesticides or fertilizers unless prior use has shown the combination physically compatible, effective and non-injurious under local conditions.
