

Vredo **DZ5** series
Turf-Fix™

The **Vredo DZ5 Turf-Fix** series are super compact, accurate, and efficient disc seeders designed for inter-seeding into prepared seedbeds or existing stands of turf. At a spacing of 1 3/8", seed is placed in a V-shaped slit at a controllable depth of 3/16" to 1" deep, directly in contact with the soil for maximum germination rate. The **Turf-Fix** series includes precision calibration and a ground driven system allowing inter-seeding to be completed with a small utility vehicle. Seed will be accurately sown at a set rate independent of ground speed.

HIGHLIGHTS

- Industry leading germination rate
- Minimal surface disruption – no clean up needed
- Proper seed to soil contact to maximize germination
- Super compact design ideal for small areas
